PROFESSIONAL TRAINING

Full Stack Development Training — SLA Institute, Chennai	2025 - 2026
- Completed 6 months of intensive, project-driven MERN Stack training covering React.js, Node.js, Express.js, and MongoDB for enterprise-grade applications. - Mastered RESTful API design, JWT authentication, Express middleware, database CRUD management, and collaborative Git workflows.	

PROJECTS

Task Tracker

- Tech Stack:** React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT
- Built a real-time task management platform with Admin, Manager, and Employee roles for task assignment, progress tracking, and feedback.
 - Designed secure REST APIs with JWT authentication and bcrypt hashing; integrated Socket.IO for real-time messaging and Docker for consistent deployment.

Village Citizen Management System

- Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary
- Developed a centralized citizen services portal digitizing local governance records for Panchayat administration, replacing manual record-keeping.
 - Implemented full CRUD REST APIs secured with bcrypt and JWT, built custom input-validation middleware, and integrated Cloudinary for reliable media storage.

V2C (Village to Chennai)

- Tech Stack:** React.js, JavaScript (ES6+), Tailwind CSS, REST APIs, Vercel
- Built a responsive resource directory using React Hooks to help newcomers find emergency services, PGs, food, travel, and medical help in Chennai.
 - Designed custom, reusable UI components and optimized React state management; configured continuous deployment on Vercel for fast production releases.

Family Vault

- Tech Stack:** React.js, Node.js, Express.js, MongoDB Atlas, JWT, Multer, Cloudinary
- Built a secure digital document management platform with file upload and in-app preview using Multer and custom middleware.
 - Engineered protected CRUD endpoints with JWT and bcrypt encryption, integrated Cloudinary, and containerized backend services with Docker for Render deployment.
